Announcement: New 3D Printing Book Kit

By TOYSINBOX PEOPLE

Hello everyone! We are going to release our **second** 3D modeling for 3D printing book in Nov. This time the theme is **space**. There is no place like space! There's no place like the universe you create! We are revealing a few pages from the book, and **you guys are the first to peak inside**. Later, we will spread the word about the peak-inside on Facebook, Instagram, and YouTube.

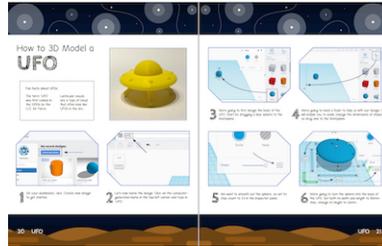

Like our first book, this new book provides step-by-step and clear instructions supported by colorful pictures to help you create five space projects. The skills you learn from this book will help you make other future projects.
